## Listen even longer

Our smallest custom hearing aids give you 20% longer life out of every battery – that's around 16 hours of extra use\*.

## Stay in the conversation

No two ears are alike. Our sophisticated EarMatch™ modeling process provides the best personalised performance by compensating for your unique ear shape, so you can hear every word of your conversations.

## Experience realistic listening

You'll love how realistic everything sounds. Not only will you be aware of what's happening around you, but things will sound just the way they should.

## Handle with ease

In one easy step, these hearing aids go in your ear and stay out of the way.

\*On CIC and IIC products

## Accessories enrich your hearing

From discreetly making volume or program adjustments, to delivering sound from your TV, ask how accessories work with your hearing aids to make listening even more satisfying.

## Always here for you

We believe a warranty is a warranty no matter where you are. With offices in 65 countries around the globe, Inera hearing aids can travel worry-free.

## Personalised from the inside out

Insera hearing aids are customised to you in every way. They are molded to comfortably fit the contours of your ear just right. The features and technology level are matched to your unique listening lifestyle, so everything sounds fantastic to your ears. And they even come in a range of blend-in colors, so nobody will notice you're wearing them.

## Find your best technology level

The best technology level for you is the one that has the right features for your lifestyle.

**T Pro** – Pinpoints speech from all directions in the most challenging situations and provides the most realistic listening experience for all types of sound, in addition to beautiful sounding music.

**T 800** – Emphasises speech from multiple directions when background noise is high and provides realistic listening in quieter situations, in addition to beautiful sounding music.

**T 700** – Emphasises speech from the front when background noise is high and provides realistic sound in quieter situations.

**T 600** – Enhances speech and provides comfortable listening.

**T 500** – Improves hearing in quieter situations.

### Lifestyle change? No problem.

Ask how the technology level in your hearing aids can be upgraded at any time to suit your changing listening lifestyle.

Match your listening demands to the right solution								
Situation examples	Conversation in a crowd	Conversation in noise	Conversation in a small group	Conversation in quiet	Quiet	Noise	Music	Performance features
								Effectiveness of performance features in each listening environment is rated on a scale of 1 to 5 stars (1=lowest; 5=highest).
